

Lady Lumley's School

Newsletter

6th October 2023

Issue Number 3

Dear Families,

Thank you to all the families who allowed 90 Lady Lumley's students to support our Year 5/6 Open Evening on Wednesday this week. The school was absolutely packed to the gunnels and we had some great feedback from prospective Year 7 parents and some excited Year 5 and 6. Our sixth form were out in force showing the 6 year journey they have been on and sharing their plans for Apprenticeship and University. The Enrichment Offer gave Mr Mann the opportunity to drum up the next generation of Duke of Edinburgh candidates and Ms Rueth showed our brilliant library off. I would also like to recognise Keegan, George, Kate and Poppie who spoke to an audience of 500 without looking even slightly nervous.

Mrs Welburn-Kelly has had a day of Year 11 Musicians in their GCSE performance exams and there are many other subjects preparing students in class and after school for their PPEs. Our Geographers have been on fieldwork this week and the Art and French Department travel to Paris next weekend. Year 8 visit Scarborough Science Fair next week and the BBC are in at Lady Lumley's to talk about careers today. On Wednesday next week we have a Sixth Form Experience Day for Year 11, building on their planning from Year 10 and from this year in tutor time.

A reminder to all families - Lady Lumley's have a training day on Thursday 12th October so the school will be closed to children.

Clair Foden

Headteacher

Spotlight on Life

What a busy half term it has been for Life, both in and out of lessons!

Year 7 have begun the year by discussing how to identify good and bad qualities in a friendship. Soon they'll be discussing body image and the impact the media can have on this. Year 7 were also visited by An Invisible Man theatre group this week and saw 'Wherever Home is...', a production looking at how we cope with and manage change.

In Year 8 there have been plenty of opportunities to start thinking about the future, through Life lessons, where some students have every detail of their lives mapped out, and through participation in the Green Energy Challenge, where students came up with solutions to problems ranging from recycling in school, reusing clothes and collecting solar energy! Next week's trip to Scarborough.

In Year 9 we've been focusing on looking after our physical health, and soon we'll look at the impact that vaping can have on this, something we're looking at across KS4 as well. Given the range of vaping products, students have seen this [video](#)

looking at what studies have found inside unregulated vapes.

BBC Bitesize Visit

BBC Bitesize have been in school today as part of a national roadshow promoting Careers education. Students across a range of year groups had the opportunity to listen to representatives from Quorn, BBC Radio York and Flamingo Land as they shared their passion for their careers. More information to follow in the next edition!

Year 11 District Netball Tournament

On Tuesday 26th September the Year 11 Netball Squad travelled to Ryedale to compete in the District Netball Tournament for their year group.

Playing the previous week, the girls were excited to put into practice the focuses from their training and experience. They arrived and got straight into their warmup and evaluated the competition as they arrived team by team. Seeing familiar faces and identifying strong players from each team, the girls began to think tactics and game play.

The team of L Jordan (GK), J Benson (GD), A Colley (WA), L Brown (C/WD), L Gwilliam (GA), E Woodmansey (GS), J Felgate (GD) and I Mcneil (GS), were ready and raring to go.

In the first game the squad were bringing determination and teamwork to the forefront and showed amazing game play and communication. Competitors of Scarborough College, Ryedale, Scalby and Malton were all unique in their game play and tactics, however the girls were able to analyse and work out their strategies to gain possession in the game and work towards scoring some goals. Game, after game, they found their rhythm and players and coaches on the side-line were impressed by their ability.

In the end the girls came 6th, however a lot of recognition was given for their positive attitude and team spirit in each game. The girls have worked hard and we hope that the attitude and spirit continues as the academic year continues.

Year 9 netball tournament

In this tournament we played 5 games. We won 2 games, against St Augustine's School and Scalby School. This gave us lots of confidence for the remaining games. We then drew 1 game against Scarborough College, which we were really pleased with. We then went on to lose 2 games against Malton and Ryedale. Meaning we came 3rd overall, just one place off qualifying for the county round! We played great for our first game back and can't wait to play again. Well done girls!

GS - E Adens, GA - I Davison, WA - A Simons, C - L Bayes, WD - R Goldier, GD - A Dobson and GK - R Hodgson

Report written by A Dobson

A level Chemistry

A level Chemists visited the University of York to take part in a tour around the Chemistry department before attending a lecture delivered by Nobel prize winner, Richard Henderson. This lecture informed students on applications where chemistry meets biology and computing. This was an excellent opportunity to open eyes and minds to future paths they could take in science.

Miss Wilson

<https://www.york.ac.uk/news-and-events/events/public-lectures/sem1-23-24/electron-cryo-microscopy/>

The screenshot shows the University of York website. At the top left is the University of York logo. To the right is a search bar with the text "Search york.ac.uk" and a magnifying glass icon. Below the header is a dark navigation bar with the text "News and events". Underneath this is a lighter navigation bar with links: "News and events home", "News", "Events" (which is highlighted), "Features", "Press Office contacts", and a "More..." button. The main content area shows a breadcrumb trail: "Home > News and events > Events > Open lectures > Semester 1 - 23-24 > How electron cryo-microscopy aids the design of new medicines: Bringing proteins into focus". Below the breadcrumb trail is a section titled "Events" with a sub-header "Open lectures". Under "Open lectures" is a list of links: "FAQs", "FAQs - online events", "Privacy policy", "Join our mailing list", "Autumn 2022", "Spring 2023", "Summer 2023", and "Semester 1 - 23-24". To the right of this list is a large image of a protein structure, colored in shades of blue and yellow. Overlaid on the bottom of the image is the text: "How electron cryo-microscopy aids the design of new medicines: Bringing proteins into focus" in a large, white, serif font. Below this text, in a smaller white font, is "Nobel prize winner Richard Henderson and Jamie Blaza, University of York". At the bottom left of the page, under the heading "Other sections", are links for "News and events home", "News", and "Features".
